### Press Release

Indian Centre for Space Physics, an experienced Balloon Launch Service provider to Near Space of 35-42km range, recently launched the Payload of Constellation Aerospace Pvt. Ltd., a Bangalore based company. The launching took place from ICSP Stratospheric Balloon Facility located at Chandrapur, near Suri, Birbhum. The payload returned back to earth safely after completion of its tasks and was handed to the CEO by the Director of ICSP and his team.

Scientific balloon with payload at Chandrapur field station

Handing over of the payload by the Director of ICSP, Prof. Sandip K. Chakrabarti (Gray suit) to the CEO Mr. Punarjay Chakravarthi (Centre) in front of Chandrapur facility. As per CEO of Constellation Aerospace, their payload is testing imaging capability at various altitudes before it is sent to satellites. Prof. Chakrabarti mentioned that all the startup of India can test their payloads by using the balloon facility of ICSP. This is a great opportunity for school and college children through India to learn how to make payloads for various measurements and send their experiments/instruments to Space at very low cost.

For any other inquiry, I may be contacted through +91 9903120700.

Prof. Sandip K. Chakrabarti  
Director, Indian Centre for Space Physics
